PROFESSIONAL SUMMARY

Business intelligence analyst with 4+ years turning complex financial and operational datasets into dashboards, forecasts, and actionable recommendations that drive decisions at the director and executive level. At MGM Resorts, I build interactive Power BI and Excel reporting tailored to end-user needs, automate SQL data pipelines that streamline the extraction, transformation, and delivery of data, and train non-technical stakeholders to interpret and use analytics tools independently. I hold an MS in Business Analytics and bridge the gap between data query and actionable analytics for operational, finance, and leadership audiences.

EXPERIENCE

MGM Resorts International

Las Vegas, NV

Revenue Manager, Revenue Planning & Analysis

3/2026 – Present

- Analyze complex financial and operational datasets to uncover trends, patterns, and opportunities for performance improvement, delivering findings and recommendations to directors and executive directors
- Build and maintain interactive, user-friendly dashboards and self-service reporting tools (Power BI, Advanced Excel/VBA, SQL) tailored to end-user needs, giving stakeholders accurate and timely access to data without analyst intervention
- Automate data pipelines that streamline the extraction, transformation, and delivery of data for analysis and reporting, reducing manual effort and increasing refresh frequency
- Independently redesigned a core pricing and reporting tool (Excel, SQL, VBA, XML), replacing a fragile manual workflow with an automated solution now used across the team
- Conduct root cause analysis to identify the underlying reasons for trends and anomalies in performance data, and provide actionable recommendations to correct them
- Perform regular data quality checks and validation in partnership with technology, digital, and data teams to confirm the integrity of underlying data sources and improve data accuracy and reliability
- Author systems documentation and SOPs and train stakeholders on how to interpret and utilize dashboards, reports, and analytics tools to drive informed decision-making
- Manage multiple concurrent analytics projects, prioritizing requests based on organizational impact, stakeholder needs, and deadlines

Revenue Manager, Mandalay Bay & W Las Vegas

3/2024 – 3/2026

- Owned analysis and pricing decisions for a two-property portfolio generating \$344MM in annual revenue
- Developed and applied statistical models, forecasting techniques, and predictive analytics for occupancy and demand, translating model output into capacity plans used by operations and sales leadership
- Served as liaison between analytics and operating departments, ensuring a shared understanding of data requirements, definitions, and outputs

Revenue Manager, Park MGM & The Reserve/NoMad

6/2022 – 3/2024

- Managed pricing strategy and analysis for a portfolio generating \$162MM in annual revenue
- Presented complex data findings three times weekly to directors and executive directors through compelling storytelling — charts, graphs, and narrative — to clearly convey insights and defend recommendations
- Educated stakeholders on data insights across customer segments, promoting data-driven decision making among partner departments

Allegiant Air

Las Vegas, NV

Revenue Management Analyst

1/2022 – 6/2022

- Used Python and Excel to perform advanced data extractions, cleaning, and analysis from multiple data sources supporting pricing and demand decisions

TECHNICAL SKILLS

- **Data & Query:** SQL, Advanced Excel (including VBA development), Python, SAS, Databricks (Azure), relational data modeling
- **Visualization & BI:** Power BI, Tableau, dashboard design, self-service reporting, Microsoft Office suite
- **Methods:** Statistical modeling, forecasting & predictive analytics, time series analysis, root cause & variance analysis, ETL/data pipeline automation, data quality validation, requirements gathering, systems documentation
- **Certificates:** Google Advanced Data Analytics Professional Certificate (June 2024)
